

COMBIMAC I30

Combimac: all your cleaning needs in one combined machine

A sturdy sweeper and a high-performance floor scrubber combined in a single machine to make you double productivity. This is Combimac, the Comac combined machine born from the union on a single frame of the most innovative cleaning technologies in terms of industrial sweepers and scrubbing machines.

Combimac is the solution that allows you to sweep and scrub in a single pass large surfaces ranging from 20,000 to 60,000 sqm.

DESIGNED TO MEET THE NEEDS ACROSS MANY INDUSTRIES

All of Comac's know-how merges into Combimac to best deal with any dirty condition in the environments of the industrial, logistic and transport sectors, as well as fruit and vegetable markets. But it has also been designed to work in the presence of lighter dirt, for example in large-scale retailing areas, in exhibition centers and in large exhibition areas.

INDUSTRIAL CLEANING JUST GOT EASY

All the latest generation Comac technology has been integrated into Combimac and can be accessed via the touch screen display, which allows you to take advantage of the machine's intelligent functions.

It is a combined machine born from the fusion of a sweeper and an industrial floor scrubber, from which it also inherited the ease of use that has always distinguished Comac machines.

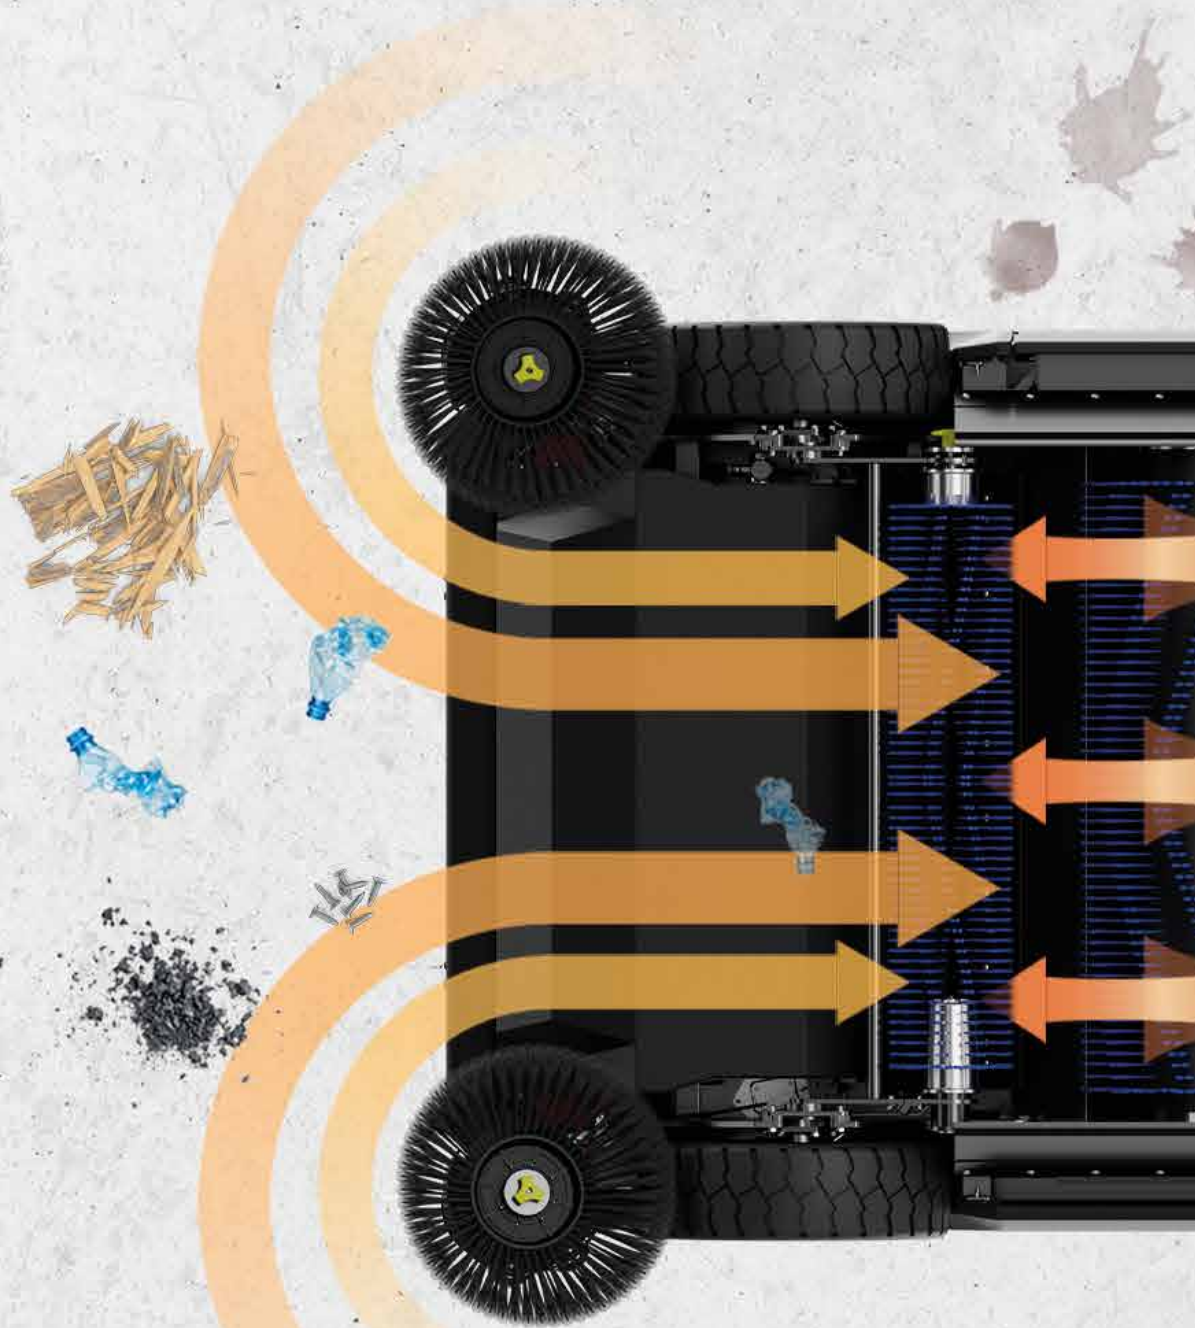

FOR THOSE WHO EXPECT THE BEST OF WHAT IS POSSIBLE

A careful study of ergonomics has allowed an optimal adaptation of the man-machine system to guarantee the operator a comfortable and protected seat. The working position is raised, decentralized and moved towards the front of the Combimac to maximize visibility during its use.

One machine, endless solutions

Combimac is equipped with a separate double-action system made up of a sweeping system of a street sweeper and a washing base of a scrubbing machine. This allows you to have only one machine to sweep and scrub floors in a single pass.

A Combimac for everything. Get an overview of everything that is happening inside this combined machine designed for industrial floor cleaning:

A POWERFUL SWEEPER

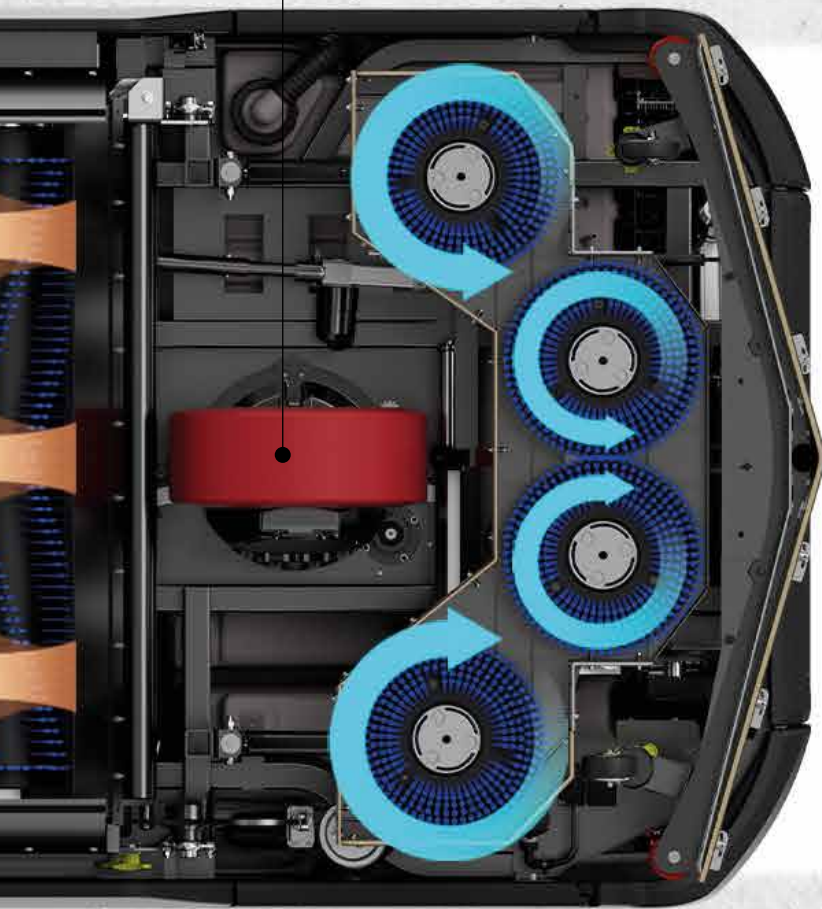

The sweeping system of Combimac is that of a powerful sweeper equipped with two side brushes which convey dirt and solid debris to the central part of the machine. From here they are collected thanks to the central sweeping unit, which is made up of two counter-rotating cylindrical brushes.

This configuration eliminates the need for the front flap lifting mechanism, thus allowing Combimac to pick up any type of dirt: dust, voluminous and light pieces such as cans, bottles or leaves but also heavier ones such as stones, fragments of wood or fruit. The dirt then ends up in the collection debris hopper, which is operated by hydraulic pistons to be easily emptied.

UP TO
25%

READY FOR ANYTHING

Thanks to the powerful motor wheel and rear-wheel drive, the Combimac manages ramps perfectly, overcoming slopes of up to 25%.

Excellent
cleaning
results

A GREAT FLOOR SCRUBBER

The Combimac scrubbing system is that of a high-performance industrial floor scrubber made up of four disc brushes which distribute and convey the detergent solution towards the squeegee and the suction system.

Green combination

Combimac is battery powered and can deliver up to 6 hours of autonomy thanks to the optimization of energy efficiency. This allows the machine to offer maximum freedom of use in all environments, even indoor ones, with zero-fuel and zero-emissions.

PRODUCTIVITY, LEVELLED UP

With Combimac you no longer have to sweep before scrubbing. A single machine that allows you to sweep, scrub and dry in a single pass, significantly increasing productivity, thus halving the costs and time dedicated to cleaning.

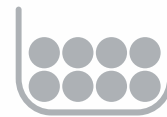

The combined machine you've been waiting for

ALL THE POWER OF A COMAC SWEEPER AND FLOOR SCRUBBER ENCLOSED IN A SINGLE MACHINE:

Working width:

1900 mm (with side brushes) **1300 mm** (scrubbing brushes)

Sweeper debris hopper:

300 l

Solution tank:

300 l

Only **2850 mm** long
